Which AP Math Course Should I Choose?

	AP Calculus	AP Statistics	Both	Neither
Love of Math?	I love Algebra, problem solving, and I'm good at it! I get so much satisfaction out of getting a tough problem right!	I'm curious about how math can be applied and how I can manipulate data to interpret real-world situations!	I'm up for a challenge. I have a good work ethic and good attitude about anything that's thrown my way.	I don't really like math and am not willing to put in the effort when I don't like something.
College Plans?	I'm thinking of pursuing a career in math, physics, engineering, computer science, business, or economics.	I'm thinking about majoring in nursing, business, finance, or psychology.	I'm not sure. I'm considering medical school or law school, but I definitely want to keep my options open.	I may choose a college major like elementary education, humanities, criminal justice, social work, or communications.
Previous Skills?	I definitely have good Algebra skills, and I'm willing to stick with a problem until I figure it out. I did well in Precalculus.	I have good reading comprehension skills, and I'm pretty good at explaining myself.	I'm willing to try anything and put forth the extra effort if I struggle with something.	I have some decent math skills, but if it doesn't come easy to me, I'll give up quickly.
Senior Schedule?	I can devote an hour or two each day to working on an AP class.	I can devote an hour or two each day to working on an AP class.	I'm good at time management and motivated to work on schoolwork, even if things get busy.	I really don't have the time to devote to studying.
What's the homework like?	Typical math problems, approx. 20 each night. No textbook reading required.	Textbook reading required. Word problems and calculator work, approx. 3 each night.		
What kind of grade should I expect?	About 5-10 points lower than my precalculus average	About the same as other AP classes I've taken	Balance is key. The class you put more effort into will result in a higher grade.	
What kind of AP Score should I expect?	I should expect to pass this exam with a 3,4, or 5. Most students earn a 4 or 5.	I should expect to pass this exam with at 3, 4, or 5. Most students earn a 3 or 4.	Comprehension is key. The class you understand more will result in a higher score.
